

By clicking to agree, you acknowledge and accept the terms outlined in the Interest Computation Guide, providing a clear understanding of how interest rates are calculated for saving products.

- **Interest Calculation:** The interest earned on your saving product is calculated based on various factors, including prevailing market conditions, the performance of the selected digital assets, and other relevant market indicators.
- **Variable Interest Rates:** The interest rates for saving products are subject to market demand and may vary over time. MostWallet reserves the right to adjust the interest rates at its discretion, considering factors such as market conditions, liquidity, and risk management.
- **Displayed Rates:** Any displayed interest rates are for informational purposes only and are subject to change on a daily basis, without prior notice. These rates serve as a reference and may not reflect the final interest amount earned.
- **Evaluation of Risks:** Before making any saving product decisions, it is important to carefully evaluate and assess the risks associated with the interest rates offered. The final interest amount may vary based on the actual performance of the deposited digital assets.
- **Monitoring and Updates:** MostWallet continuously monitors the market conditions and reviews the performance of the deposited assets to ensure the most accurate calculation of interest rates. For any questions or concerns, please reach out to [support@mostwallet.com](mailto:support@mostwallet.com).
